Autism Spectrum Disorders | GreenMedInfo | Disease

Media Release. The number of people who are diagnosed with autism spectrum disorder (ASD) continues to rise in Australia. Autism, once considered rare, is now 31% of NDIS participants, the largest disability group in the scheme according to recent the NDIS Quarterly Report issued in June 2015.

Autism prevalence in Australia 2015 | Autism Aspergers

The heritability of autism is the proportion of differences in expression of autism that can be explained by genetic variation; if the heritability of a condition is high, then the condition is considered to be primarily genetic. Autism has a strong genetic basis, although the genetics of autism is complex and it is unclear whether autism spectrum disorder (ASD) is explained more by multigene ...

Heritability of autism - Wikipedia

The thiomersal controversy describes claims that vaccines containing the mercury-based preservative thiomersal contribute to the development of autism and other brain development disorders. Thiomersal is no longer used in children's vaccines in the United States, except some types of flu shots. While exposure to mercury may result in damage to brain, kidneys, and developing fetus, the current ...

Thiomersal controversy - Wikipedia

In September 1999, California signed into law the "Mental Health Parity Bill," which requires health insurance coverage for the diagnosis and medically necessary treatment for serious mental illnesses, including pervasive developmental disorders or autism, for individuals of any age and serious emotional disturbances of a child under the same terms and conditions as a medical condition.
