predictive analytics using big data and a field experiment, all in a retailing context. Finally, the ethical and privacy issues that may arise from the use of big data in retailing are also highlighted.

The Role of Big Data and Predictive Analytics in Retailing

The traditional view of data management and analysis in retail has been tool-driven – be it relational data-bases of decades past or Business Intelligence tools more recently. In EKN's view, "business analytics" is a concept that focuses on decisions and outcomes, and is a far better indicator of the future of retail analytics.
