Platinum Catalysts in Petroleum Refining

Reforming processes using platinum catalysts have become of major importance in petroleum refining during the past seven years. They enable the octane rating of naphthas to be greatly increased, and are more economical than any other refining process for the production of high octane gasoline.

Platinum Catalysts in Petroleum Refining | Johnson Matthey

catalyst for petroleum refining [19]. He emphasized that catalytic refining is gaining importance as it enables improvement in octane rating. Emam studied clays as catalyst for in petroleum refining industry [20]. He noted that clays are used in petroleum industry for number of processes like

A Review on Petroleum Refining and Petrochemical Processes

Catalysis plays a key role in petroleum refining as most of the processes are catalytic. Petroleum fractions produced via fractional distillation of crude oil do not fulfill the quality standards to be used as fuels and the increasing market demands.
