

clinical outcomes in home pdf

Outcomes of gait trainer use in home and school settings for children with motor impairments: A systematic review Ginny Paleg¹ and Roslyn Livingstone² ... Outcomes and clinical information was divided into ICF11,12 components of body structure and function, activity and participa-

Clinical Rehabilitation Outcomes of gait trainer use

Design, setting, participants, & measurements Clinical outcomes by cannulation method were reviewed in 90 consecutive home hemodialysis patients. Initially, patients were trained in rope ladder cannulation. From 2004 on, all incident patients were started on buttonhole cannulation, and prevalent patients were converted to this cannulation method.

Article Buttonhole Cannulation and Clinical Outcomes in a

It is the outcome enhancement activities that allow an agency to focus its quality (or performance) improvement activities on select target outcomes, to investigate the care processes that contributed to these outcomes, and to make changes in clinical actions that will lead to improved patient outcomes.

Outcome-Based Quality Improvement (OBQI)

A home-based walking program that incorporated aerobic and resistance exercise did not result in improved clinical outcomes at 1-year follow-up in this cohort of patients with systolic HF.

Effects of a home-based exercise program on clinical

![[Figure]] [1] Background and objectives Patients undergoing hemodialysis with a frequency other than thrice weekly are not included in current clinical performance metrics for dialysis adequacy. The weekly standard Kt/Vurea incorporates treatment frequency, but there are limited data on its association with clinical outcomes.

Weekly Standard Kt/Vurea and Clinical Outcomes in Home and
