Statistical Process Control is not an abstract theoretical exercise for mathematicians. It is a hands-on endeavor by people who care about their work and strive to improve themselves and their productivity every day. SPC charts are a tool to assist in the management of this endeavor. The decisions about what needs to be improved, the

ers to replace the human function, the term automatic control came into use. 2.1 Process-Control Principles
In process control, the basic objective is to regulate the value of some quantity. To regulate means to maintain that quantity at some desired value regardless of external influences. The desired value is called the reference value or setpoint.
