This book has evolved from lecture notes on longitudinal data analysis, and may be considered suitable as a textbook for a graduate course on correlated data analysis. This book is inclined more towards technical details regarding the underlying theory and methodology used in software-based applications.

Analyzing Correlated Data in SAS ... Correlated data are extensively used across disciplines when modeling data with any type of correlation that may exist among observations due to clustering or repeated measurements. When modeling clustered data, Hierarchical linear modeling is a popular multilevel modeling technique which is widely ...
