It's one thing to create a great piece of software. It's quite another to have it make a mark on the entire industry. These are the companies and organizations whose work has had a significant impact on what others build, how they build it, and ultimately, who uses it: Apple, Facebook, Google, IBM, Intel, Microsoft, GitHub, Netflix, Red Hat, Slack, and The Linux Foundation.

Software testing is an investigation conducted to provide stakeholders with information about the quality of the software product or service under test. Software testing can also provide an objective, independent view of the software to allow the business to appreciate and understand the risks of software implementation.
