

high performance embedded computing pdf

An embedded database system is a database management system (DBMS) which is tightly integrated with an application software that requires access to stored data, such that the database system is "hidden" from the application's end-user and requires little or no ongoing maintenance. It is actually a broad technology category that includes database systems with differing application programming ...

Embedded database - Wikipedia

Open-source computing hardware comprises computers and computer components with an open design. They are designed as open-source hardware using open-source principles.. Partially open-source hardware. Hardware that uses closed source components Computers Single-board computers. Tinkerforge RED Brick, executes user programs and controls other Bricks/Bricklets standalone
