Key ideas. Scrum is a lightweight, iterative and incremental framework for managing product development. It defines "a flexible, holistic product development strategy where a development team works as a unit to reach a common goal", challenges assumptions of the "traditional, sequential approach" to product development, and enables teams to self-organize by encouraging physical co-location or ...

Value-stream mapping has supporting methods that are often used in Lean environments to analyze and design flows at the system level (across multiple processes).. Although value-stream mapping is often associated with manufacturing, it is also used in logistics, supply chain, service related industries, healthcare, software development, product development, and administrative and office processes.

- At this point, DevOps is over a decade old. It's come a long way over the years and has its roots in the principles of Agile and Lean. It was at the Agile conference in 2008, where Andrew Shafer and Patrick DuBois started a conversation about Agile infrastructure, after Patrick's presentation on Agile infrastructure and operations.
