

mechatronic systems sensors and pdf

Mechatronics, which is also called mechatronic engineering, is a multidisciplinary branch of engineering that focuses on the engineering of both electrical and mechanical systems, and also includes a combination of robotics, electronics, computer, telecommunications, systems, control, and product engineering. As technology advances over time, various subfields of engineering have succeeded in ...

The first annual "Humies" competition was held at the 2004 Genetic and Evolutionary Computation Conference (GECCO-2004) in Seattle. Entries were solicited for cash awards for human-competitive results that were produced by any form of genetic and evolutionary computation and that were published in the open literature during previous year.

Human-Competitive Awards 2004 – Present

Different Types of Piezo Mechanisms Solve Different Problems: Not all piezo actuators and motors are created equal. There are a large variety of different designs optimized for different applications, from extremely high force or microsecond response, to long travel ranges in the millimeter and centimeter range.
