Numerical Iteration Method A numerical iteration method or simply iteration method is a mathematical procedure that generates a sequence of improving approximate solutions for a class of problems. A specific way of implementation of an iteration method, including the termination criteria, is called an algorithm of the iteration method.

Numerical methods John D. Fenton a pair of modules, Goal Seek and Solver, which obviate the need for much programming and computations. Goal Seek, is easy to use, but it is limited " with it one can solve a single equation, however complicated or however many spreadsheet cells are involved, whether the equation is linear or nonlinear.
