## **the decision was always pdf**

“A compromise between an optimistic and pessimistic decision coefficient of realism,  $\alpha$ , is selected by the decision maker to indicate optimism or pessimism about the future  $0 < \alpha < 1$ . When  $\alpha$  is close to 1, the decision maker is optimistic. When  $\alpha$  is close to 0, the decision maker is pessimistic.

decisions I have made. My decisions have always been governed by my thinking. Therefore, I am where I am today “mentally, physically, spiritually, emotionally, and financially” because of how I think. Today I will begin the process of changing where I am “mentally, physically, spiritually, emotionally, and financially” by changing the way I think.

## **LESSON 3: DECISION MAKING AND PROBLEM SOLVING**

In a decision tree the first node is always a decision node. There may also be other decision nodes. If there is another decision node then we evaluate the options there and choose the best one, and the expected value of this option becomes the expected value of the branch leading to the decision node.
