

### **the dissociation of a pdf**

Dissociation (in the wide sense of the word) is an act of disuniting or separating a complex object into parts. Dissociation may also refer to: Dissociation (chemistry), general process in which molecules or ionic compounds (complexes, or salts) split into smaller particles, usually in a reversible manner Dissociation (neuropsychology), identification of the neural substrate of a particular ...

### **Dissociation - Wikipedia**

In psychology, dissociation is any of a wide array of experiences from mild detachment from immediate surroundings to more severe detachment from physical and emotional experiences. The major characteristic of all dissociative phenomena involves a detachment from reality, rather than a loss of reality as in psychosis.. Dissociation is commonly displayed on a continuum.

Dissociative Identity Disorder is caused by "overwhelming experiences, traumatic events, and/or abuse occurring in childhood", particularly when traumas begin before age 5. [4]:293, [1]:122 The child's repeated, overwhelming experiences usually occur alongside disturbed or disrupted attachment between the parent/caregiver and the child.
