RF24Network is a network layer for Nordic nRF24L01+ radios running on Arduino-compatible hardware. It's goal is to have an alternative to Xbee radios for communication between Arduino units. It provides a host address space and message routing for up to 6,000 nodes.

RF24Network for Wireless Sensor Networking | maniacbug

In information science, profiling refers to the process of construction and application of user profiles generated by computerized data analysis.. This is the use of algorithms or other mathematical techniques that allow the discovery of patterns or correlations in large quantities of data, aggregated in databases. When these patterns or correlations are used to identify or represent people ...

The Internet of things (IoT) is the network of devices such as vehicles, and home appliances that contain electronics, software, actuators, and connectivity which allows these things to connect, interact and exchange data.. IoT involves extending Internet connectivity beyond standard devices, such as desktops, laptops, smartphones and tablets, to any range of traditionally dumb or non-internet ...

Learn how to establish a RF Communication link between two Microcontrollers to send and receive data without wires ! We will use Atmel AVR ATmega16 MCUs and Low Cost ASK RF modules.

RF Communication Between Microcontrollers – Part III

Some months ago I wrote about a hack I did to one of my Sonoff devices to be able to use a simple current sensor to monitor my washer machine process and alert me whenever my laundry was done.. A few weeks ago Itead Studio released two new models for their Sonoff line, the POW and the DUAL. And the POW is Itead's answer to my hack. I'm not saying they copied me, just that the Sonoff POW ...

The Sonoff POW - Tinkerman

The e-Health Sensor Shield V2.0 allows Arduino and Raspberry Pi users to perform biometric and medical applications where body monitoring is needed by using 10 different sensors: pulse, oxygen in blood (SPO2), airflow (breathing), body temperature, electrocardiogram (ECG), glucometer, galvanic skin response (GSR - sweating), blood pressure (sphygmomanometer), patient position (accelerometer ...

e-Health Sensor Platform V2.0 for Arduino and Raspberry Pi

We based our work on the excellent post over here but contrary to the author, we did not try out multiple sensors and we are using an Arduino Fio.. In this tutorial, we'll focus on how to get your Sharp Optical Dust Sensor to work and what to watch out for.
