Play is essential to development because it contributes to the cognitive, physical, social, and emotional well-being of children and youth. Play also offers an ideal opportunity for parents to engage fully with their children. Despite the benefits derived from play for both children and parents, time for free play has been markedly reduced for some children.

The Whole School, Whole Community, Whole Child, or WSCC model, is CDC's framework for addressing health in schools. The WSCC model is student-centered and emphasizes the role of the community in supporting the school, the connections between health and academic achievement and the importance of evidence-based school policies and practices.

Setting boundaries is an important part of establishing one's identity, as well as being crucial for one's mental health and well-being. There are different types of boundaries, from physical boundaries to emotional boundaries, and there are also different levels of boundaries, from loose to rigid, with healthy boundaries falling somewhere in between.

In recognition of the important role fathers play in the welfare and development of their children, this manual builds on the information presented in earlier user manuals in this series as it relates specifically to fathers. It was written to help child protective services caseworkers work effectively with, support, and strengthen the role of fathers in their children's lives.
